FOUNDER, AND
MANAGING EDITOR 1943–1965
W. PRAGER

VOLUME XLV 1987

CONTENTS

ELIAS C. AIFANTIS (*see* K. KUTTLER)

NICHOLAS D. ALIKAKOS AND DANIEL PHILLIPS: A remark on positively invariant regions for parabolic systems with an application arising in superconductivity 75

LARRY R. ANDERSON: Weighted Liapunov functions for a class of third-order autonomous differential equations 481

STEVEN P. ANDERSON AND ARTHUR D. GORMAN: Caustics associated with the asymptotic solution of the diffusion equation 783

W. T. ANG: A boundary integral equation for deformations of an elastic body with an arc crack 131

THOMAS C. ASSIFF AND DAVID H. Y. YEN: On the solutions of clamped Reissner–Mindlin plates under transverse loads 679

B. S. BERGER (*see* M. ROKNI)

D. BLANCHARD AND G. A. FRANCFORT: Asymptotic thermoelastic behavior of flat plates 645

L. L. CAMPBELL: Fourier transforms which are asymptotically Cauchy densities 93

M. M. CARROLL: Pressure maximum behavior in inflation of incompressible elastic hollow spheres and cylinders 141

P. CHADWICK AND T. C. T. TING: On the structure and invariance of the Barnett–Lothe tensors 419

LL. G. CHAMBERS: Note on the functional differential equation $\frac{d}{dx}\{\phi(x)\} - a\phi(x^\lambda) = 0$ 695

C. Y. CHAN AND Y. C. HON: A constructive solution for a generalized Thomas–Fermi theory of ionized atoms 591

D. S. CHANDRASEKHARAIAH: Complete solutions of a coupled system of partial differential equations arising in thermoelasticity 471

S. CHIRIŢĂ: On the asymptotic partition of energy in linear thermoelasticity 327

GIOVANNI CIMATTI: A rigorous justification of the Reynolds equation 627

DEAN S. CLARK: Stability in a system of difference equations 441

S. L. COLE: Transient waves produced by a moving pressure distribution ... 51

B. D'ACUNTO: The moving load on a string as free boundary problem 201

C. M. DAFERMOS: Trend to steady state in a conservation law with spatial inhomogeneity 313

A. M. J. DAVIS AND K. B. RANGER: A Stokes flow model for the drag on a blood cell 305

W. A. DAY: Adiabatic invariants for strings and membranes subjected to slowly-varying tension 349

W. A. DAY: Adiabatic invariants for strings, membranes, and beams of slowly-varying dimensions 389

W. A. DAY: Sinks and boundary temperatures that neutralize a heat source 185

R. W. DICKEY: Membrane caps 697

DAVID DURBAN: Plastic stresses induced by a rigid ring embedded in a thin anisotropic plate under uniform tension 341

F. ERDOGAN (*see* A. C. KAYA)

M. FABRIZIO (*see* A. MORRO)

G. A. FRANCFORT (*see* D. BLANCHARD)

ARTHUR D. GORMAN (*see* STEVEN P. ANDERSON)
T. B. GRIFFIN (*see* B. D. REDDY)
S. C. GUPTA: Temperature and moving boundary in two-phase freezing due to an axisymmetric cold spot 205
S. I. HARIHARAN: Nonlinear acoustic wave propagation in atmosphere 735
P. HENRICI AND G. R. WILKENS: An application of the multivariate Lagrange–Bürmann expansion in mathematical geodesy 165
Y. C. HON (*see* C. Y. CHAN)
KENNETH B. HOWELL: Asymptotic behavior of periodic, periodic biharmonic and periodic harmonic functions 279
TIMOTHY L. JOHNSON (*see* RONALD K. PEARSON)
M. C. JORGE: Local existence of the solution to a nonlinear inverse problem in gravitation 287
A. C. KAYA AND F. ERDOGAN: On a solution of integral equations with a generalized Cauchy kernel 455
A. C. KAYA AND F. ERDOGAN: On the solution of integral equations with strongly singular kernels 105
B. W. KNIGHT (*see* L. SIROVICH)
M. R. S. KULENOVIĆ, G. LADAS and A. MEIMARIDOU: On oscillation of nonlinear delay differential equations 155
K. KUTTLER AND ELIAS C. AIFANTIS: Existence and uniqueness in non-classical diffusion 549
G. LADAS (*see* M. R. S. KULENOVIĆ)
LUIZ A. C. LADEIRA AND PLÁCIDO Z. TÁBOAS: Periodic solutions of the equation $\ddot{x} + g(x) = E\cos t + \sigma h(t)\dot{x}$ 429
CHARLES G. LANGE (*see* HUBERTUS J. WEINITSCHKE)
LIVIU LIBRESCU: Refined geometrically nonlinear theories of anisotropic laminated shells 1
GERALD S. MANNING: Relaxed elastic line on a curved surface 515
GERALD S. MANNING: The winding of a relaxed elastic line on a cylinder .. 809
LUKE F. MANNION: Dynamic fracture of a beam under compression 713
J. B. MARTIN (*see* B. D. REDDY)
A. MEIMARIDOU (*see* M. R. S. KULENOVIĆ)
A. MORRO AND M. FABRIZIO: On uniqueness in linear viscoelasticity: a family of counterexamples 321
N. MOSTAGHEL: Response bounds for hysteretic second order systems 173
A. NADARAJAH AND R. NARAYANAN: On the completeness of the Rayleigh–Marangoni and Graetz eigenspaces and the simplicity of their eigenvalues .. 81
R. NARAYANAN (*see* A. NADARAJAH)
RICHARD D. NOREN: A linear Volterra integrodifferential equation for viscoelastic rods and plates 503
D. F. PARKER: Dynamical equations for the finite elastic bending, torsion, and stretching of rods 533
RONALD K. PEARSON AND TIMOTHY L. JOHNSON: Energy equipartition and fluctuation-dissipation theorems for damped flexible structures 223
THOMAS J. PENCE: Formulation and analysis of a functional equation describing a moving one-dimensional elastic phase boundary 293
N. PHAN-THIEN: A three-dimensional stretching flow of an Oldroyd fluid ... 23
DANIEL PHILLIPS (*see* NICHOLAS D. ALIKAKOS)

A. PIVA: An alternative approach to elastodynamic crack problems in an orthotropic medium 97
JEAN-CLAUDE RAMIREZ: The three-dimensional stress intensity factor due to the motion of a load on the faces of a crack 361
K. B. RANGER (*see* A. M. J. DAVIS)
K. B. RANGER: Diffusion and convection of vorticity at low Reynolds numbers produced by a rotlet interior to a circular cylinder 669
B. D. REDDY, J. B. MARTIN and T. B. GRIFFIN: Extremal paths and holonomic constitutive laws in elastoplasticity 487
M. ROKNI AND B. S. BERGER: Lyapunov exponents and subspace evolution 789
STEVEN I. ROSENCRANS: On Amundson's model of the unsteady combustion of a slab of carbon 795
JACK SCHAEFFER: Discrete approximation of the Poisson–Vlasov system 59
GILBERTO SCHLEINIGER: Quasi-transonic flow past delta wings 265
JINSONG SHI (*see* CHIA-SHUN YIH)
R. E. SHOWALTER AND N. J. WALKINGTON: A hyperbolic Stefan problem 769
LAWRENCE SIROVICH: Turbulence and the dynamics of coherent structures .
Part I: Coherent structures 561
Part II: Symmetries and transformations 573
Part III: Dynamics and scaling 583
L. SIROVICH AND B. W. KNIGHT: Two-scale eigenfunction methods with an application to the visual system 749
S. H. SMITH: A note on the Stokes' paradox 529
CHARLES G. SPEZIALE: On helicity fluctuations in turbulence 123
CHARLES G. SPEZIALE: Second-order closure models for rotating turbulent flows 721
T. C. T. TING (*see* P. CHADWICK)
PLÁCIDO Z. TÁBOAS (*see* LUIZ A. C. LADEIRA)
A. VISINTIN: Supercooling and superheating effects in heterogeneous systems 239
N. J. WALKINGTON (*see* R. E. SHOWALTER)
ELIAS WEGERT: On a nonlinear problem of the theory of potential flows 691
HUBERTUS J. WEINITSCHKE AND CHARLES G. LANGE: Asymptotic solutions for finite deformation of thin shells of revolution with a small circular hole 401
G. R. WILKENS (*see* P. HENRICI)
D. E. WILSON: The unsteady boundary layer on a cylinder due to small transverse oscillations 601
DAVID H. Y. YEN (*see* THOMAS C. ASSIFF)
CHIA-SHUN YIH AND JINSONG SHI: Stability of time-periodic temperature fields 39
CHIA-SHUN YIH: A solitary group of two-dimensional deep-water waves 177
JIONGMIN YONG: Stabilization of linear systems by time-delay feedback controls 377
